**Subject:** Leviathan site visit

I would like to schedule a site visit to the Mine to give Forest Leadership an opportunity to view the scale and scope of current operations and also have a substantive discussion about the various options being considered as components of the long-term remedy. I think all of us would benefit from hearing the Forest's perspective regarding the variables that should be considered prior to remedy selection and implementation. Ultimately I view this trip as a chance for the Carson District Ranger, the Deputy Forest Supervisor and the Forest Engineer to see the scale and scope of the current operations and how these are being considered in the RI/FS documents being compiled. If there are others that you think would provide value to this meeting, please encourage their attendance.

Currently I'm looking at a 0900-1300 timeslot on Wednesday August 9 with a backup day on the 11th. Please let me know (ASAP) if either of these days works and I'll finalize a schedule. Scheduling in the summer is brutal by design.....
